

Dairy Grip Rubber

Features:

- Offers maximum durability, noise reduction and improved traction
- Supplied in rolls allowing lengths to be cut to exact size
- The rubber experiences less lifting and damage than interlocking mats.
- The integral steel cable system ensures the dairy grip roll will not stretch and can easily withstand tractor weight and high impact.
- This tough and highly durable material is unaffected by automatic scrapers or skid steers making cleaning easy and efficient.
- Deep Groves provide optimum traction
- Proven to increase dry matter consumption rates at the feed fence

Technical Information:

Length	Sold per metre
Depth	0.75 - 1 inch deep
	Install with telehandler
Materials	Natural rubber with steel cables
